Guidelines for Authors of Abstracts for the Spring 2015 PeWe Workshop

Jozef MRKVIČKA*

Slovak University of Technology in Bratislava
Faculty of Informatics and Information Technologies
Ilkovičova 2, 842 16 Bratislava, Slovakia
mrkvicka@fiit.stuba.sk

Each abstract represents the key issues of the authors' work on a project related to the area of web technologies or web engineering. The header on the first page consists of the title, author's name and address. In the footer place the name of the supervisor without his/her titles together with our institute name. The heading on the second page presents the field (or topic) of the research presented – please fill it according position of your paper in the contents provided by the editors.

The abstract should describe the main ideas and the expected contribution of the project work. Please do not use any headings. The abstract should contain exactly 2 pages formatted according to this template. It is advantageous to include a picture representing a schema of proposed solution. 2-4 references are also welcomed.

For texts use the *Times New Roman* font, the use of other fonts than defined in this template is not allowed. The first paragraph after a heading has to be formatted using the style *Normal First*, while each following paragraph is formatted using the style *Normal*. For other texts use standard formatting techniques, such as unnumbered list (*Style Bulleted*):

- Item 1
- Item 2
  - Item 2.1
    - Item 2.1.1
- Item 3

The text which follows right after an itemized list (e.g., *Style Bulleted* or *Style Numbered*), figures, tables or equations should be formatted as *Normal First*. A numbered list should be formatted as follows:

1. Item 1
2. Item 2

* Supervisor: Name Surname, Institute of Informatics and Software Engineering

Spring 2015 PeWe Workshop, April 11, 2015, pp. 1–2.

   a. Item 2.1
      i. Item 2.1.1
3. Item 3

Do not add any page numbering to your paper other than the one predefined in this template as the final numbering will be provided by proceedings editor. Similarly, avoid the use of references using page numbers.

If your abstract is based on the accepted paper to the Student Research Conference (IIT.SRC 2013), please indicate this on the bottom just before the acknowledgement

- use “amended version” if you copied almost everything (applicable for extended abstracts in the IIT.SRC proceedings)
- use “extended version” if you have accepted full paper and use the ideas, figure or some text from it.

You need not use quotations as there is the statement about the source of text. When producing camera ready in next step you will receive information on pages and text of the acknowledgement.

Amended/Extended version was published in Proc. of the 10th Student Research Conference in Informatics and Information Technologies (IIT.SRC 2014), STU Bratislava, xx-xx.

Acknowledgement. This work was partially supported by the..
