

SeBe 7.0

Healthy Body, Healthy Mind, Healthy Research

OBJECTIVES

The Semantic Beer workshop is a premium venue for high quality peer-reviewed research on beernovation, savouring, applied brewing and tapping technologies. It is concerned with all aspects of modern beer data (both linked and big) universum research including beertology learning, parallel and/or distributed beer ingestion, taste classification, breweries knowledge base maintenance. The workshop's aim is to reinforce the Semantic Beer paradigm and to bring value to everyday life by advancing in areas of recommendation (of beer), personalized navigation (to pubs), technology enhanced learning (of new tastes and brands) and intelligent search (for appropriate mug).

Today, we are witnessing an increased concern for the future of young researchers. A particular problem, which emerges from the abyss of state-of-the-art non-BDR approaches, is the social and mating impotence¹. The roots of the problem lie in inappropriate preference for purely mind-based activities over the physical-based ones. Therefore, the idea of kalo kaghatos triplet, the body-mind-research grows in importance more than ever. SeBe 7.0, as a leading forum for kalokaghatia, will focus on exploring, studying and shaping relationships between three important essences in adaptive systems: people, knowledge, and beer.

CALL FOR BOTTLES

The autumn edition of the SeBe for the year 2012 welcomes and seeks for submissions and tutorials for the following tracks:

- Modern pentathlon
- Trippel jump
- Sprint 100 m
- Ale vault
- Wrestling

This edition is especially focused on (but not restricted to) physical and harmonic characteristics of beer rather than quantity. We encourage the BDR practitioners to submit bottles of unusual physical characteristics or bottle combinations with harmonic characteristics.

IMPORTANT DATES

- October 20th 2012, 20:00, Submission start
- October 20th 2012, 20:00, Notification of acceptance

¹ The beergebraic logic here is antisymmetric. The statement “the world looks nicer after me having a beer” does not automatically imply that “the complementary world perceives me nicer after me having a beer”. It rather implies that “the complementary world perceives me nice after all the members of the complementary world had a beer”. This, perhaps true, is impossible in praxis and remains a challenging task for future research.

PROGRAMME

- 19:30 SeBe 7.0: Piesok 2012 Opening Ceremony
- 19:35 BDR: Deeper Insight Into the Philosophy
- 19:45 Recommended Research Practices: Märzen
- 20:00 SeBe Submissions Line-Up
- 20:15 Olymbeer Games: Piesok 2012
- 20:45 Beerathon
- 23:59 Piesok 2012 Closing Ceremony

SeBe general chair

Šimko, Marián, PhD., Ing.

SeBe 7.0 programme chair

Šimko, Jakub, Ing.

SeBe steering committee

Barla, Michal, PhD., Ing.
