

Academia SeBeana

(academic year 2015/2016, autumn semester)

In vino veritas, in cerevisia scientia

MISSION AND OBJECTIVES

As malt, hops, and water are the main ingredients of every beer, so relentless pursuit of Beer-Driven Research (BDR), dissemination of knowledge and beernovation are the main objectives of Academia SeBeana, which was established in the academic year 2013/14.

We keep finger on the pulse of cutting-edge research areas, such as Beertifical intelligence, one of the Tap learning approaches gaining currently a lot of traction for various tasks, such as automated generation of beer order sequences. However, Academia SeBeana also honours and pays much of attention to scholarship, naturally connected to the requirements of beerindustry as well as research.

Overall, our mission is to raise a new generation of young beertelligence able to pursue the Holy Grail of beer science – finding the creative and productive peak: the SeBe peak.

STUDY PROGRAMMES

In the academic year 2015/2016 we open study programmes in all three levels of study in the field of Beergineering:

- undergraduate programmes awarding the degree of Bachelor of Beergineering (BBeng.) in:
 - Beerformatics
 - Brewing technologies
 - Drink security
- graduate programmes awarding the degree of Master of Beergineering (MBeng.) in:
 - Beergeneering
 - Hop systems
- doctoral programmes awarding the degree of Cerevisiae Doctor (CeD.) in:
 - Applied beerformatics
 - Bottling systems

The details on graduate profiles can be found [here](#) (in Graduate Profile section).

ENROLMENT

In order to enrol for the studies in the first year or the following years, the students have to prove that they fulfil the preconditions of successfully completing the college studies or that they meet the objectives of the previous study year by providing a glass **bottle**¹ of **beer** as a symbol of their study potential and achievements.

Previously enrolled students (see this [list](#)) are obliged to bring their [index](#), which shows all their study achievements.

BEER.SRC

Academia SeBeana is proud to announce BEER.SRC (Student Research Conference on BEER-driven Research), the goal of which is to inspire original student submissions in the form of a glass **bottle** of **beer** that represent a contribution to the current state of beer knowledge corresponding to the given level of study. The contributions should adequately represent the students' results so far; a special focus is given on the evaluation in the form of their own experiments or case studies.

STUDY SCHEDULE

December 5th 2015

19:00	Academia SeBeana 2015/16 Semester Opening
19:15	Student Enrolment, BEER.SRC Submissions
19:30	Report from World BDR Congress 2015
19:40	Beerssertation Exams
20:00	BEER.SRC
Beer'o'clock	Semester evaluation

Bratislava, December 2nd 2015

Prof. MBeng. Marián Šimko, CeD.,
Prof. MBeng. Michal Barla, CeD.,
MBeng. Jakub Šimko, CeD.,
MBeng. Róbert Móro, CeD.

¹ A *can*, though filled with delicious beer, is not a *bottle*.
